

Apollo

Apollo (R) has a more compact and bushy habit than Sonata

Apollo (R) has a more compact and bushy habit than Sonata

Apollo (R) has larger flowers than Sonata

Apollo *Cosmos*

- Compared to Sonata, Apollo will bloom about 6" shorter
- Greater branching results in an increased flower count, both in the pot stage and in the garden
- Greatly improved flower quality. The individual petals are larger, broader and overlapping
- Disease tolerance; Apollo was awarded an AGM by the RHS in Summer 2016 for its above qualities and resistance to powdery mildew
